

SOC INCIDENT REPORT

Risk Tier: HIGH

Technical Summary: 14 alerts across 13 assets show suspicious authentication and lateral movement activity involving the CFO's email account, API gateway, DNS infrastructure, and production cloud systems, with connections to 8 external IP addresses and mining-related domains. Attackers have likely obtained valid credentials to your finance leadership and critical infrastructure, creating immediate risk of unauthorized access to sensitive financial data and operational systems.

Total Alerts: 14 **Triggers:** 1
LLM Enhanced: Yes (claude-haiku-4-5-20251001)

Containment Steps:

- See SOC incident response playbook.

Window: 08:00 – 12:12

Severity Breakdown:

Severity	Count
Low	3
High	7
Medium	4

Trigger Timeline:

Timestamp	Alert ID	Category	Tier	Kill Chain
2026-04-24 08:00:00	W101	informationgathering	LOW	RECON
2026-04-24 08:00:30	W102	informationgathering	LOW	RECON
2026-04-24 08:02:00	W103	authentication	MEDIUM	INITIAL_ACCESS
2026-04-24 08:04:00	W104	authentication	MEDIUM	INITIAL_ACCESS
2026-04-24 10:00:00	W201	execution	MEDIUM-HIGH	EXECUTION
2026-04-24 10:03:00	W202	authentication	MEDIUM	INITIAL_ACCESS
2026-04-24 10:06:00	W203	execution	MEDIUM-HIGH	EXECUTION
2026-04-24 10:09:00	W204	execution	MEDIUM-HIGH	EXECUTION
2026-04-24 10:13:00	W205	lateral_movement	HIGH	LATERAL_MOVEMENT
2026-04-24 10:17:00	W206	lateral_movement	HIGH	LATERAL_MOVEMENT
2026-04-24 12:00:00	W301	informationgathering	LOW	RECON
2026-04-24 12:04:00	W302	authentication	MEDIUM	INITIAL_ACCESS
2026-04-24 12:08:00	W303	authentication	MEDIUM	INITIAL_ACCESS
2026-04-24 12:12:00	W304	authentication	MEDIUM	INITIAL_ACCESS

Indicators of Compromise (external only):

- 198.51.100.72
- 203.0.113.11
- 45.33.32.156
- corp.com
- api.php
- node.js
- pool.minexmr.com
- cloud-vm-prod-14.corp.cloud

Affected Assets:

- cfo@corp.com
- api-gateway.corp.com
- dns-ext-01.corp.local
- ws-dev-03.corp.local
- cloud-vm-prod-14.corp.cloud
- dc-ad01.corp.local
- finance@corp.com
- srv-app-01.corp.local
- 10.0.0.0/8
- srv-db-01.corp.local
- bastion-01.corp.local
- www.corp.com
- vpn-gw-01.corp.local

Detected CVEs:

- CVE-2026-1234

SOC Recommendations:

- Increase monitoring frequency on affected assets; review recent authentication events.

Recommended Actions:

- Revoke CFO and all API gateway service account credentials; force password reset and enable MFA Identity & Access Management
- Isolate affected assets (dns-ext-01, api-gateway, cloud-vm-prod-14) from production network pending forensic imaging Security Operations Center
- Block all 8 external IoCs at perimeter and review past 30 days of traffic to these addresses for data exfiltration Network Security Team
- Preserve logs and memory from all 13 affected assets; initiate forensic investigation to determine initial compromise vector and dwell time Incident Response & Forensics
- Notify legal and compliance teams; prepare NIS2 notification documentation given infrastructure compromise Legal & Compliance

Attack Vector Analysis: RECON → INITIAL_ACCESS → EXECUTION → LATERAL_MOVEMENT
