

SOC INCIDENT REPORT

Risk Tier: LOW

Technical Summary: Two alerts captured reconnaissance activity originating from IP 203.0.113.99 targeting your firewall and public web server, consistent with pre-attack intelligence gathering. An external actor is actively probing your network perimeter, which typically precedes a targeted attack and could lead to unauthorized access or data compromise.

Total Alerts: 2 **Triggers:** 1
LLM Enhanced: Yes (claude-haiku-4-5-20251001)

Threat Classification (LLM): External reconnaissance and pre-attack intelligence gathering

Priority Actions (0–1h):

- Block inbound traffic from 203.0.113.99 at perimeter firewall (fw-ext-01.corp.local)
- Verify fw-ext-01.corp.local and www.corp.com for active scanning/probing activity
- Capture and preserve all logs from affected assets for forensic analysis

Priority Actions (1–4h):

- Conduct full packet capture analysis on fw-ext-01.corp.local for IOC 203.0.113.99 traffic patterns
- Review www.corp.com web server logs for reconnaissance indicators (port scans, vulnerability scanning, directory enumeration)
- Query EDR/SIEM for any lateral movement attempts originating from reconnaissance phase

Priority Actions (4–24h):

- Implement enhanced monitoring on fw-ext-01.corp.local and www.corp.com for 72 hours post-incident
- Conduct threat intelligence lookup on 203.0.113.99 for attribution and historical abuse patterns
- Document findings and update network segmentation rules to prevent similar reconnaissance

SIEM/EDR Threat Hunting Queries:

- Search for all connections from source IP 203.0.113.99 to fw-ext-01.corp.local and www.corp.com in last 7 days
- Timeline reconstruction: identify all scanning/probing attempts, port connections, and HTTP requests from 203.0.113.99 to affected assets
- Query for any internal host communications with 203.0.113.99 or lateral movement post-reconnaissance detection

Window: 14:00 – 14:02

Severity Breakdown:

Severity	Count
Low	2

Trigger Timeline:

Timestamp	Alert ID	Category	Tier	Kill Chain
2026-04-24 14:00:00	W401	informationgathering	LOW	RECON
2026-04-24 14:02:00	W402	informationgathering	LOW	RECON

Indicators of Compromise (external only):

- 203.0.113.99

Affected Assets:

- fw-ext-01.corp.local
- www.corp.com

Detected CVEs:

- No CVEs referenced in this window.

SOC Recommendations:

- Increase monitoring frequency on affected assets; review recent authentication events.

Recommended Actions:

- Block IP 203.0.113.99 at the perimeter and review firewall logs for the past 7 days to identify what was probed Security Operations
- Scan both affected assets (fw-ext-01 and www.corp.com) for unauthorized changes or backdoors installed during reconnaissance Infrastructure Security
- Brief executive leadership on the reconnaissance activity and establish a 48-hour escalation protocol if additional probing from this or related IPs is detected CISO Office

Attack Vector Analysis: RECON
